

GUARDIANS OF TREASURE

Guardians of Treasure is a mid-core multiplayer online blockchain strategy Play & Own game aiming to provide a state-of-the-art open to all Web 3.0 experience to fans and gamers as well as blockchain and crypto enthusiasts. The game offers an exciting and intriguing play and own gameplay with smart NFTs in a historical game universe.

Gameplay mechanics and features

Guardians of Treasure is an elaborate game that starts with players building towns while trading, fighting, and forging alliances. Continuous battles will help expand the world map into an ever-evolving game universe. Goals for players include daily missions, general tasks, and story missions, with progression based on the successful completion of these tasks and missions.

The game features a variety of heroes, each with their own special abilities. These abilities provide additional benefits beside the general stats of heroes and add deeper tactics into the game.

The World of Treasure

The world of Treasure is a rich and vibrant one filled with historical figures, events, tribes, and alliances adjusted to create more exciting gameplay and engaging storylines. The game will evolve as new leaders and regions are introduced for players to explore and dominate.

What makes Guardians of Treasures unique?

Through the hard work of our experienced team, we have crafted an innovative setting and gameplay, yet our game also solves 2 major problems common in Blockchain gaming:

1. **Quality:** Due to the hype of the business, many crypto-games are quick cash-grabs clones of existing popular games. Our experienced team of almost 50 people has decades of work experience working on some of the biggest games and studios in the industry. Many of our core teams come from gaming studios such as InnoGames, Wargaming, King, Kabam, 5thPlanet Games, Wooga, and many others, or have worked directly on Star Wars & Disney productions. With this, we put great focus on creating a fun, quality experience.
2. **Community:** With the emerging field of Play-to-Earn (P2E) games and blockchain technology, players are finally empowered to truly own in-game assets and generate value that way. We are aiming to build a platform providing helpful content to find the most promising P2E games, guides to help you navigate through the blockchain space and latest news so you don't miss out on new opportunities.

What to expect from the game?

Guardians of Treasure has created an immersive experience that brings back the nostalgic feeling from playing Age of Empires. Although it is

a fun experience that is likely to keep you engaged for hours, there are a few areas which require improvement such as an ambient soundtrack or a more exciting combat system.

Looking at the graphics of the game, they are what a player looking to play this genre would expect. The animations of the workers constructing the buildings are well designed and the way a player can explore the world provides a great visual experience.

Game Description:

"Guardians of Treasure" is an addictive game with the possibility of withdrawal of a real money! Just sign up, read the instructions and start earning. All earned money you can withdraw at any time! The game is based on real market laws. All transactions in the game are made exclusively between the participants of the project.

Features:

Min deposit - 0.002 BTC

Min withdrawal - 0.001 BTC (no any fee)

2500 silver coins for registration

10% welcome bonus on your 1st deposit

Ability to play using your own development plan and strategy

5% referral program

Game process:

To start earning you need to recruit at least 1 unit of Guardians. The more units (workers, soldiers) you recruit, the more income you get. On achievement of several levels a new opportunities become available, that allows to earn even more. Your own production becomes available at the fifth level. The goods, as well as the collected resources can be sold. Earned profit can be withdrawn to your Bitcoin wallet. The higher your level the more opportunities for earnings you have. Players who love the risk can try their luck in our gambling house. If you do not have enough money to build some buildings or to recruit new unit, then you can take a loan.

Aim of the game:

To collect as many Coins as possible. There are two ways to go about this: find treasure and legends belonging to other players; allow your own legends and treasure to be discovered by other players.
